

Relatório do trabalho de POO

- Daniel Natan dos Santos Brito – N: 15446902

- Responsável pelo Front End do projeto, em JavaFX
- Implementação do código do Back End para o Front End
- Classes:

- Guilherme Borges de Pádua Barbosa – N: 15653045

- Back End - parte dos usuários e relatórios estatísticos
- Contribuiu com a implementação no Front End
- Classes:

AdmFeatures:

Method
<code>createAny(String[?] name, String[?] email, String[?] password, String[?] password2, String[?] role)</code>
<code>deleteAny(String[?] idUserToBeDeleted)</code>
<code>editAny(String[?] id, String[?] newName, String[?] newEmail, String[?] newPassword, String[?] newPassword2, boolean compareName, boolean compareEmail, boolean comparePassword)</code>
<code>seeAllArtists(String[?] FILE_PATH)</code>
<code>seeAllMusics(String[?] FILE_PATH)</code>
<code>seeAllPlaylists(String[?] FILE_PATH)</code>
<code>seeAllUsers(String[?] FILE_PATH)</code>

AdmUser:

```
Method
getData()
getFormatData()
getRole()
```

ArtistUser:

```
Method
getData()
getFormatData()
getRole()
```

FileInfo:

```
Method
getMatrixInfo(String FILE_NAME)

getRawData(String FILE_NAME)
```

LogIn:

```
Method
defUser(String[] userInfo)

login(String userInput)
```

PublicUser:

```
Method
getData()
getFormatData()
getRole()
```

SignUp:

```
Method
setId(int newId)

signup(String user,
password, String password2,
boolean selfMade)

userCompare(String user,
password, String password2)
```

ArtistFeatures:

```
seeAllOwnMusics(String FILE_PATH)
```

CommonFeatures:

```
playAsListener()
deleteSelf()

deleteSelf(User user)

editSelf(String newName, String newEmail,
String newPassword, String newPassword2,
boolean compareName, boolean compareEmail,
boolean comparePassword)

followUser(String userToBeFollowed, String
idUserToBeFollowed)

> getAllFollowers(int identifier)

> getAllFollowings(int identifier)

unfollowUser(String userToBeUnfollowed,
String idUserToBeUnfollowed)

updateFollowers(String newData)
```

ModifyUser:

```
Method
modUser(String fileContent, String oldContent,
String newContent, String fileName)
```

RecordUser:

```
Method
replaceInFile(String fileName,
String newContent)

writeInFile(String fileName,
String newContent)
```

User:

```
Method
getData()
getEmail()
getFormatData()
getId()
getName()
getPassword()
getRole()
```

- Mikhael Lazarev Nogueira Barbosa – N: 15480495
 - Back End - Parte das músicas e playlists
 - Contribuiu com a implementação no Front End
 - Classes:

MusicDatabase:	Method
	<pre>> getMusicCSVFile()</pre>
	<pre>updateMusicCSVFile(List<String> []> musicCSVFileList)</pre>

PlaylistDatabase:	Method
	<pre>> generateTop10Playlists(List<String> []> musicCSVFileList)</pre>
	<pre>> getPlaylistCSVFile()</pre>
	<pre>updatePlaylistCSVFile(List<List<String> >> playlistCSVFileList)</pre>

ArtistFeatures:	Method
	<pre>deleteMusic(List<String> music)</pre>
	<pre>editMusic(List<String> music)</pre>
	<pre>uploadMusic(List<String> music)</pre>

CommonFeatures:	Method
	<pre>addMusicToPlaylist(List<List<String> >> playlistCSVFileList, String playlistName, String musicID)</pre>
	<pre>createPlaylist(List<List<String> >> playlistCSVFileList, String playlistName, String userName, String visibility)</pre>
	<pre>deletePlaylist(List<List<String> >> playlistCSVFileList, String playlistName)</pre>
	<pre>editPlaylist(List<List<String> >> playlistCSVFileList, String oldPlaylistName, String newPlaylistName, String newVisibility)</pre>
	<pre>removeMusicFromPlaylist(List<List<String> >> playlistCSVFileList, String playlistName, String musicID)</pre>
	<pre>viewCounter(String musicID)</pre>
